GO Enrichment: pCR vs pNR

lymphocyte mediated immunity
mitochondrial respirasome
respiratory chain complex
respirasome
aerobic respiration
oxidative phosphorylation
leukocyte mediated immunity
atic recombination of immune receptors built from immunoglobulin superfamily domains
inner mitochondrial membrane protein complex
oxidoreduction−driven active transmembrane transporter activity
cellular respiration
respiratory chain complex I
NADH dehydrogenase complex
mitochondrial respiratory chain complex I
ATP synthesis coupled electron transport
cellular response to molecule of bacterial origin
leukocyte migration
leukocyte cell−cell adhesion
response to molecule of bacterial origin
cellular response to biotic stimulus
regulation of cell−cell adhesion
positive regulation of leukocyte cell−cell adhesion
positive regulation of cell−cell adhesion
mononuclear cell differentiation
positive regulation of lymphocyte activation
leukocyte proliferation
positive regulation of cell adhesion
positive regulation of cytokine production
positive regulation of leukocyte activation
positive regulation of cell activation
